

NORTH WALSHAM URBAN DISTRICT COUNCIL.ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE YEAR 1944.

To

The Chairman and Members of the North Walsham Urban District
Council.

Gentlemen,

I have pleasure in presenting to you my Annual Report for the Year 1944. As in the previous five years, the Minister of Health has decided that only an interim report should be made. Notifiable Disease returns show three cases of Lobar Pneumonia, ten cases of Whooping Cough, four cases of Scarlet Fever, one case of Erysipelas and one hundred and fourteen cases of Measles. The sharp outbreak of Measles occurred in the first quarter of the year. The Mortality Rate in all these cases of Notifiable Disease was nil.

The number of Deaths totalled 50 as against 52 for the previous year; and, is (as far as I can ascertain) the lowest number ever recorded in this town. There were six Deaths under the age of one year.

Seven Still Births were recorded - five legitimate and two illegitimate.

There was no change in either personnel or equipment of the Health Services in the area.

Four new cases of Tuberculosis were reported in the year - all respiratory. Three were in females and one in a male. There was one death in a male - respiratory.

The number of Live Births was 76 as against 72 for the previous year; 35 were males and 41 females; 2 males and 2 females were illegitimate.

The percentage of children inoculated against Diphtheria has remained at a high figure; and once more, it is my pleasure to appreciate the sensible reactions of parents to my remarks on this important matter in the Annual Reports of the past three years. Once more I make an appeal to parents who have children of one year and over to go to their doctors and have their little ones immunised - if this has not already been done.

I am, Gentlemen,

Your obedient servant,

(Signed) Henry Morrison.

20th July, 1945.

Medical Officer of Health.
